

## Projects - Sweet baby girl

### Products used

White card

Pattern paper- Heidi's garden, Vintage collection

Create a card rub ons – the little ones collection

Rub on stickers – Little Miss ladybug collection.

### Step one

From the pattern papers cut six squares. These can all be slightly different in size as we want them overlapping on the front like a patchwork quilt. Mix them up a bit with different colours and patterns. Once happy with the selection attach them in a patchwork fashion to the front of the card. Machine stitching each alternate one in place.

### Step two

Add a 'bird' rub-on to the top left square and a 'sweet baby girl' sentiment to the middle left square.

### Step three

Take the blue flower rub-on and apply it to a piece of blue pattern paper, cut it out carefully so that you have a sweet little flower embellishment. Attach this to the bottom right square using embroidery thread to hold it in place.

### Note

Cover the inside cover of the card with a rectangle of pattern paper to hide the machine stitching.
